Your merchants will grow their subscription business with personalized shopping experiences

Rebuy's integration for Recharge will help your merchants sell more subscriptions. Merchants using Recharge to grow subscribers can now boost average subscription value using Rebuy's intelligent personalization engine.

Your merchants can plug and play using pre-built product recommendations out of the box. Or, help them fine-tune every upsell, exactly how they want. Stack rules together to create the perfect subscription strategy to drive more value.

With the Rebuy-Recharge integration, merchants can easily turn one-time buyers into repeat customers and repeat customers into subscribers.

"Fantastic app and fantastic team / customer service. This has boosted our AOV and subscription opt-in a lot. Free money. Support has been quick to go above and beyond to help fix things. Would recommend!"
