Grow your business with intelligent, personalized shopping experiences

Growing an online business quickly can be frustrating. Online stores often suffer from clunky UX, cookie-cutter experiences, and lackluster sales. Hiring a full-time developer can be expensive and time-consuming.

Rebuy solves these problems better than the rest because we provide a full suite of personalization solutions, native integration with Shopify Plus, white-glove support, and a customizable shopping cart.

Guide your customers to relevant products and promotions so they can discover new items, add them to the cart, and check out with ease.

> "Hands down the best Shopify app I've ever installed. The product is just incredible. They've thought of everything, it's super fully featured. The performance and quality of the app is amazing, and the customer support will knock your socks off."

Key benefits

- ✓ **Sales growth**. Increase order values, convert more traffic, and drive repeat business.

- ✓ **Better shopping experiences**. Turn cookie-cutter storefronts into meaningful and enjoyable shopping experiences.

- ✓ **Beautiful UX**. Every upsell and cross-sell will look like it was designed by your own team of elite developers.

- ✓ **Full customization**. Fine-tune every detail or plug and play using AI-powered offer logic.

- ✓ **All-in-one platform**. Replace single-feature apps with Rebuy's full suite of growth tools.

How it works

Rebuy uses AI (artificial intelligence) and ML (machine learning) to analyze your store's sales data and your customers' purchase behaviors to automatically increase sales with data-driven upsells, cross-sells, and automated order follow-ups.
